

TradeWindow Freight

Grow your SME Freight Forwarder or Customs Broking business with a scalable solution

A modular and fully integrated digital freight solution, TradeWindow Freight will automate and optimise your back-office operations, giving you superior control and visibility.

SCALE-UP AS YOU NEED

Only pay for what you use, with the option to scale-up as your business grows. Modules can be combined to deliver an end-to-end freight forwarding focused ERP system, and pricing is based on the number of user licenses and the selected modules.

CLOUD-BASED SAVINGS

Move to a secure cloud-based solution and immediately remove the costs of maintaining your company's hardware and local servers. Easy and secure access to your company's digital data from anywhere with an internet connection will increase your business efficiencies and save you time and money.

RELIABLE CONNECTIVITY

Ensure business resilience. Access your data without disruption or lost productivity. Our local and friendly support team, backed by our team of subject matter experts, ensure processes are in place to support your continuous business connectivity.

YOU OWN YOUR DATA

Stay in control of your data with TradeWindow Freight. Our team of subject matter experts can even help you transfer, store and manage the historical data you've been saving to your local server over the last decade, so you can have the confidence you need to run your business.

With connectivity to TradeWindow FreightLegend, and the ability to manage e-commerce.

Built to super-connect global trade

TradeWindow Freight Modules

Core capabilities include accounts, container freight station, e-commerce, export documents, freight, customs, Customer Relationship Management (CRM), order tracking, local transport, shipping and airlines, and warehousing.

Accounts Module

A multi-branch, multi-currency with a comprehensive range of facilities including general ledger, accounts receivable, accounts payable and cashbook.

Freight Module

Facilitates your operational management and financial control of import/export/sea/air shipments.

Customs Module

Manage jobs from the time that you receive documentation through to the return of the empty container, and closure of the job.

Order Tracking Module

Manage your clients' orders with automated reminders that will ensure you do not miss critical dates in the supply chain.

Transport Local

Control daily operations of your transport fleet with simple and powerful screen displays.

Warehousing

Advanced functionality to manage even the most complex warehouse environments.

TradeWindow Freight is a module connected to TradeWindow's host of end-to-end global trade solutions.

TradeWindow Freight currently supports 300+ customers in small and medium-sized businesses across Australia, New Zealand, Singapore, Pacific Islands, Papua New Guinea, Indonesia, and Malaysia.

TradeWindow is a software company that provides digital solutions for exporters, importers, freight forwarders, and customs brokers to drive productivity, increase connectivity, and enhance visibility. Our vision is to deliver trusted seamless end-to-end trade facilitation through a global trade platform.
